

Wayah® Thrive for Veteran At-Home Use

Wayah® Thrive offers an immersive, non-pharmacological system to support healthy living that may help manage anxiety, pain, PTSD, and depression. It also provides a whole health, veteran-focused solution for stress reduction, cognitive engagement, physical activity and social isolation.

Our expansive experience library provides 400+ VR/AR activities including:

- Stress reduction, mindfulness, relaxation, isolation, and mental well-being;
- Physical exercises, adaptive sports, and recreational activities;
- Mental acuity, cognitive challenges, whole health, and veteran education

The Wayah® Thrive Next-Gen program allows providers to dynamically connect to veterans, customize regimens, control experiences, and access data reports.
